//retroarch.cfg menu.style="unity" meta.disable-menubar="1" display_region=1859x2308 fb_depth=24 fb_interlace="0x1" The emulator looks great in the emulator as well, especially if you use the RetroArch SNES Controller plugin. Unfortunately, there aren't any official nunchuk and gyro controls for this emulator yet, but there is an unofficial one that you can find on the RetroArch Game Builder page. The steps required to get it working are out of the scope of this post, so if you're willing to get it working I recommend looking on GitHub. viking age is a cross platform flash game based on the viking age tribes game engine. it supports multiplayer over tcp/ip. the current version of the engine can be downloaded from the viking age graphics page . you can download the latest version of the game from the viking age releases page . currently, the windows installer file includes both 32-bit and 64-bit versions. you can use the windows 32-bit version with the redistributable package (32-bit version of the windows.net framework) or the 64-bit version. viking age alt-rec is a graphics pack based on viking age to give players a non-celtic-themed ui and custom graphics. it does not have the same level of features as the rest of the viking age repository. if you have visual studio 2017 or later installed, you can compile it from the source code. to compile the project, you need to install visual studio 2017 . after visual studio is installed, open the solution file vikingage-altrec.sln and follow the instructions to configure your build environment. you can compile and install the game after setting up the build environment. the windows installer includes binaries for both 32-bit and 64-bit operating systems.
