I am having a problem getting a connection on my C:\Program Files\LimeWire\LimeWire\share\xslx-examples\jose-velez-1.0.xlsx. Any suggestions or suggestions. I tried to install the freeware called DosaSoft Nero Burning ROM 6.0.0.10 using the instructions that were on this website. I inserted the installation CD into my drive and ran the installation. I was able to download the product but once I try to run it it says it is missing a required component and it asks for the registry key to be enabled. Can someone help me? I have a 64bit WinXP SP3 Media center. It takes about 10 minutes to start up. Once it does start up it will not load the Discovery database. So it hangs for 10 minutes then drops me into the Media Center never to load again. I have created a new PST File and I am still having problems. First, I created a new PST file. This time I left none of the properties blank. I created an empty mailbox. I then extracted the database, as instructed by the wizard, from the DosaSoft Nero. So there was nothing left in the folder with the DosaSoft Nero folder. And as soon as I entered the saved location for the new directory, it created a new folder and a new DB_ (Customer Name). This time though, there was NO (I suspect it was supposed to be, Create) Mailbox with the same name as the new folder. There were two error messages. First: The folder was not considered a valid destination. I have tried several folders on several computers and it always tells me this. Second: Mailbox (Customer Name) was already in use. I have tried running the program. It seems to run just fine. And I will get a message: Program closed unexpectedly. But with no meaning as to what happened or how to fix the problem. I run a Mac and need to download videos (and audio) from YouTube. I need to be able to: download single videos, audio and video to my computer. I have tried using VLC, and no luck in downloading the video that I need. My question is: Can anyone help me download videos? I try to install QuickTime 8 and I didn't find the file of QuickTime (64) in the folder C:\Program Files\QuickTime, only QuickTime 7. How can I install Quicktime 8? I trying to run Hero's Journey Quest on C:program Files (x86)Microsoft Games Games Hero's Journey Quest. I got "Not a valid Win32 application" error. 5ec8ef588b
